Question:- A box has 100 pens of which 10 are defective. What is the probability that out of a sample of 5 pens drawn one by one with replacement at most one is defective?

- (a) $\left(\frac{9}{10}\right)^5$ (b) $\frac{1}{2}\left(\frac{9}{10}\right)^4$ (c) $\frac{1}{2}\left(\frac{9}{10}\right)^5$
- (d) $\frac{1}{2} \left(\frac{9}{10} \right)^4 + \left(\frac{9}{10} \right)^5$

Solution: Let X be a random variable such that

RV	Value	Description
X	0	No defective pen drawn
	1	Only 1 defective pen drawn
	2	Otherwise
TABLE I		

RANDOM VARIABLE DECLARATION

$$p_X(k) = {}^{5}C_k \left(\frac{1}{10}\right)^k \left(\frac{9}{10}\right)^{5-k}$$

$$p_X(k \le 1) = p_X(0) + p_X(1)$$
(2)

$$p_X(k \le 1) = p_X(0) + p_X(1) \tag{2}$$

$$= {}^{5}C_{0} \left(\frac{1}{10}\right)^{0} \left(\frac{9}{10}\right)^{5} + {}^{5}C_{1} \left(\frac{1}{10}\right)^{1} \left(\frac{9}{10}\right)^{4}$$
 (3)

$$(2) = p_X(0) + p_X(1)$$

$$= {}^{5}C_0 \left(\frac{1}{10}\right)^0 \left(\frac{9}{10}\right)^5 + {}^{5}C_1 \left(\frac{1}{10}\right)^1 \left(\frac{9}{10}\right)^4$$

$$= \left(\frac{9}{10}\right)^5 + \frac{1}{2} \left(\frac{9}{10}\right)^4$$

$$(4)$$
